

INFOCOM

We have recently participated in INFOCOM 2007 held at Hyderabad and thanks to everyone who visited us and made it a grand success. INFOCOM reflects and embodies the dynamic ICT community – connecting leaders and technologists to discuss and debate the most important issues and strategies driving the ICT economy and what we might expect in the coming years.

Over the past 5 years, the exhibition at INFOCOM has brought together leading Indian and foreign IT players on a single platform.

Slated to be the largest showcase for business & consumer technology products in India, INFOCOM 07-08 will offer the world's best technology vendors a quality platform to exhibit, connect and conduct business with key influencers & decision-makers, senior officials, policy-makers and technocrats from commercial establishments as well as the government.

Now in its sixth year, the event will be held at two locations - Hyderabad & Calcutta - selected for their growing importance in India's ICT world.
